

ASPIRE 7.

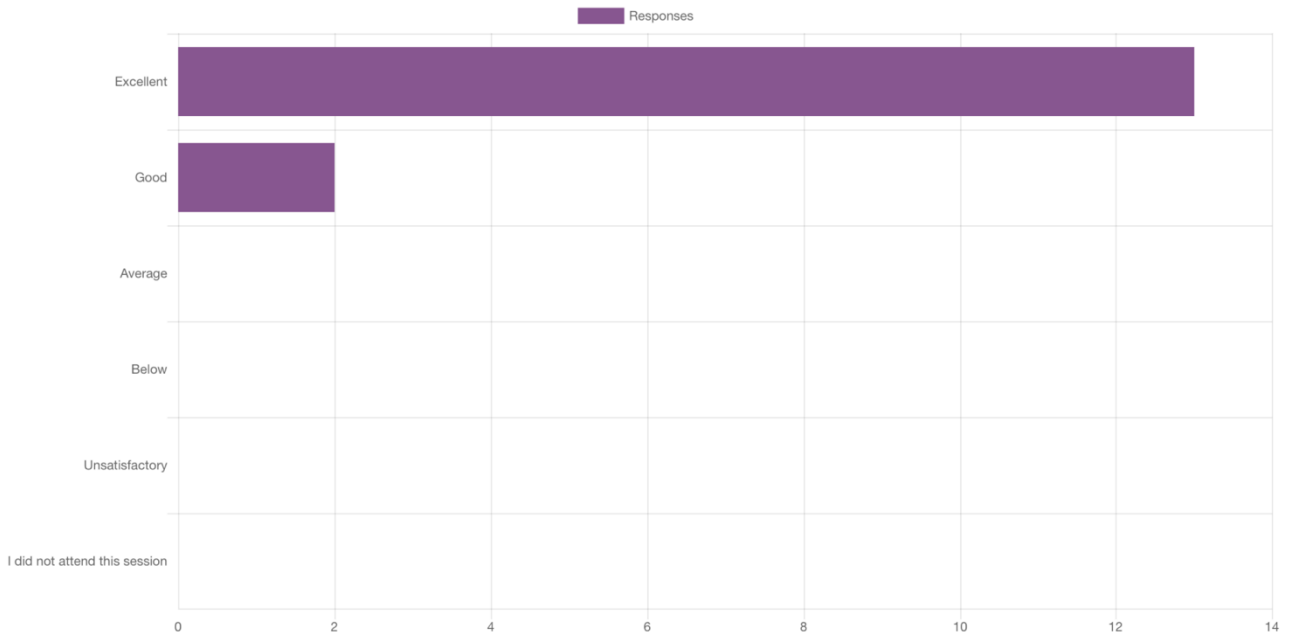

How would you rate the short cases session on day 1?

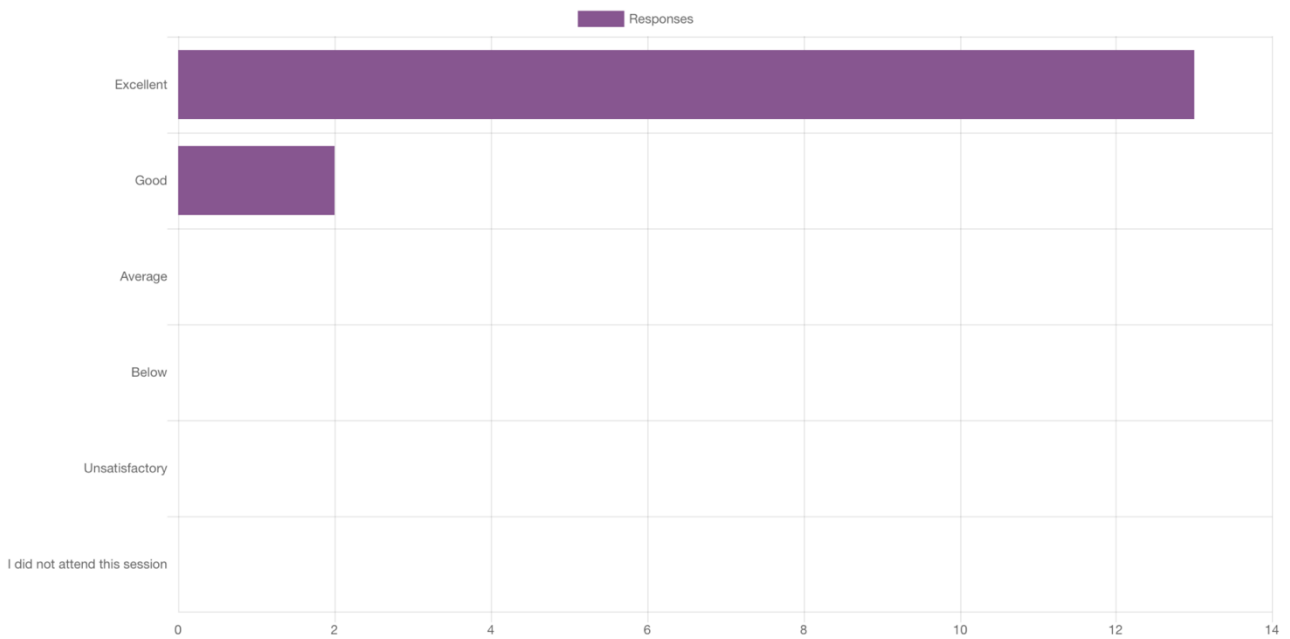

How would you rate the long cases session on day 1?

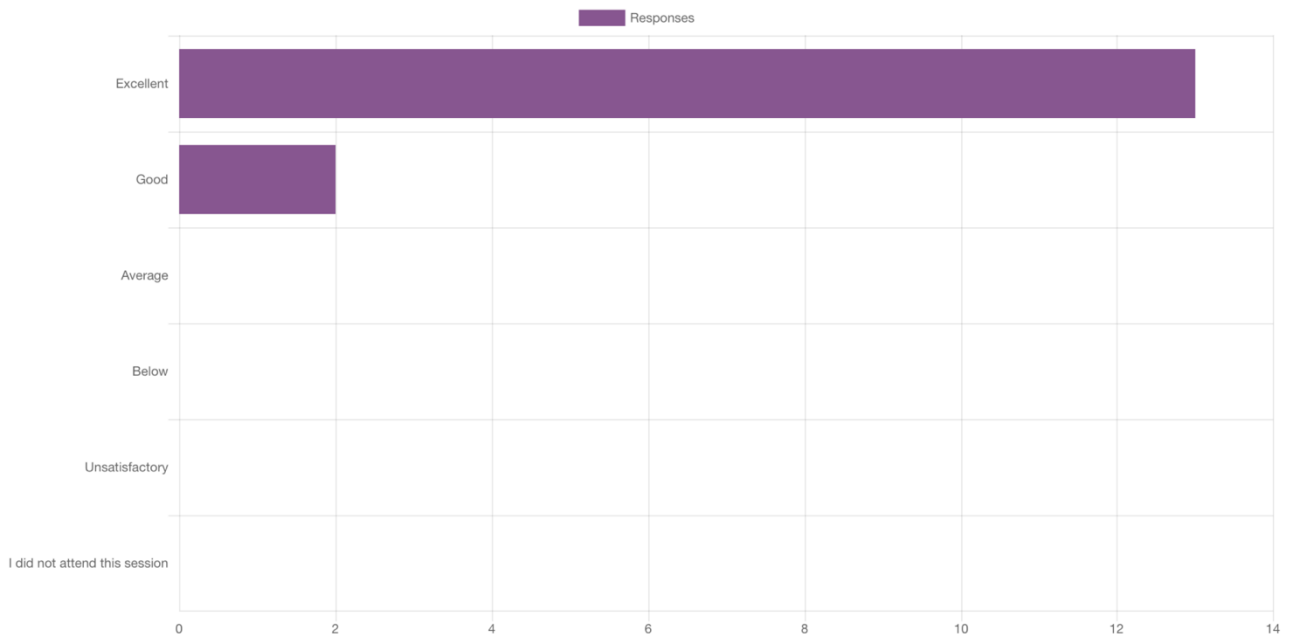

How would you rate the vivas session on day 1?

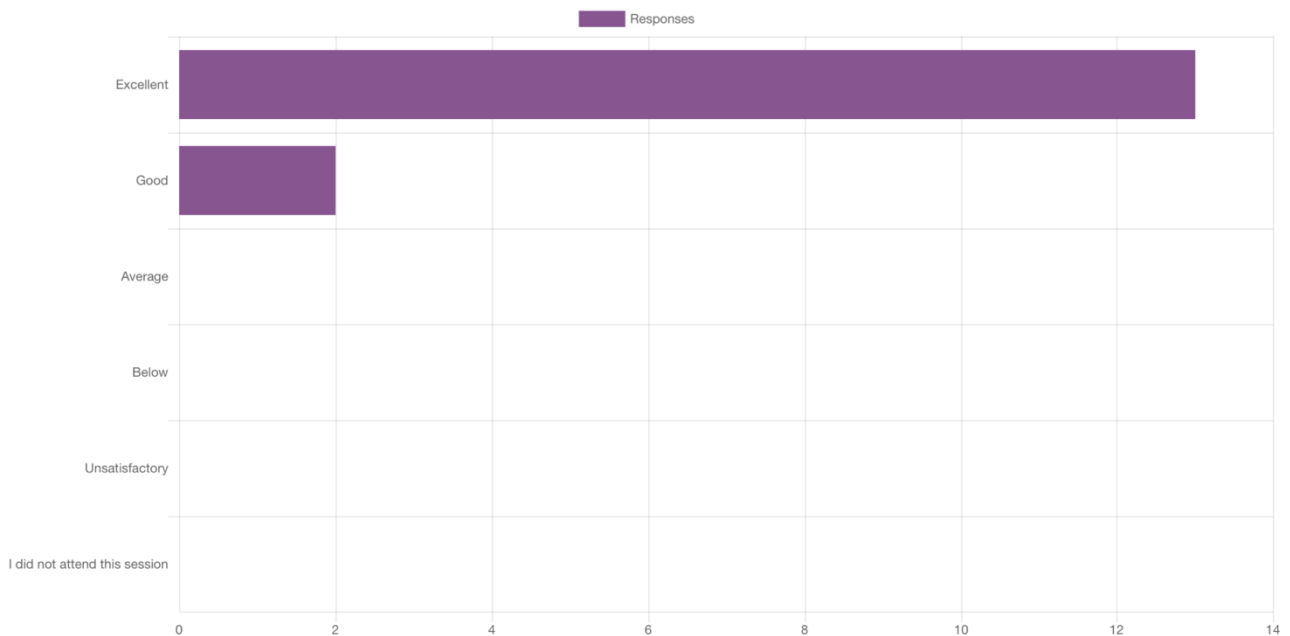

How would you rate the short cases session on day 2?

How would you rate the long cases session on day 2?

How would you rate the VIVAs session on day 2?

Any comments on the short cases session? e.g. good tutors, varied cases etc

- Tutors and case variety were great

- - Excellent – really good breath of topics and questions covered. Really supportive examiners
- - Interesting cases, good mix of examiners

- Good cases with variety of topics, maybe less on varicose veins

Any comments on the long cases session? e.g. good tutors, varied cases etc

- Some idea of how this station would be different with a patient
- Interesting cases, good mix of examiners
- Tutors and case variety were great
- Excellent examiners and questions and highlighted strengths and weakness
- Very good

Any comments on the vivas session? e.g. good tutors, varied cases etc

- Once again excellent examiners and cases
- Tutors and case variety were great. Really useful to get an idea of how the academic station would be conducted.
 - - Fantastic course, but bear in mind some have not even sat part 1
 - - Interesting cases, good mix of examiners
- give some time to read the paper to familiarize ourselves rather than diving in to questioning

Overall comments on the course? Anything good or bad?

- Overall an excellent course, which is very useful for those who are taking the exam in the next few weeks. The course was well organised and ran very smoothly! Pre-course materials were good and the evening dinner was excellent.
- Good experience of the exam process. Helpful to repeat the process to be able to demonstrate some improvement. I think immediate feedback at the end of each station is more useful
- This course was fantastic preparation for the exam, thank you to everyone involved
- Overall great course. The mock exam seemed to cover all aspects of the vascular curriculum. The faculty were friendly. The dinner venue was excellent.
- Excellent
- To me it was not clear from the email correspondance that this was soley a mock viva course. I, and other delegates, turned up thinking there was some didactic / turotial component to this course. That said the course was well run and very useful.
- So useful for me 6 wks from part2.Gave me a good feel of how intense it will be. Cases were thought provoking and broad. It has

helped me identify where to focus my revision. Thank you to everyone involved in organisation (which was excellent) and tutoring

- The course was absolutely fantastic! The faculty were superb, and organisation flawless. This is an incredible resource to offer trainees preparing for FRCS, thank you very much!!

- It would be useful if it could be established at the beginning of the course where in the exam process each candidate is. e.g I am yet to sit part one (as were a number of my fellow course attendees): this might facilitate a more tailored approach.

- Amazing course to prepare for FRCS exit exam, with a really supportive faculty. Attending the course and receiving the feedback has provided me with a lot more insight into the FRCS examination and provided with insight into the areas I need to focus upon.
