

BURNOUT AMONG SURGEONS IN THE UK: A PREVALENCE STUDY

What is the purpose of the research?

The purpose of this ethically approved study is to establish the prevalence of burnout among surgeons in the United Kingdom and associations with occupational- and socio-demographic characteristics.

Why have I been invited to take part?

You have been invited to take part in this research because you are a surgeon or trainee surgeon in the United Kingdom.

What should I do if I want to take part?

If you decide to take part you will be asked to complete an anonymous questionnaire, which should take approximately 10 minutes.

If you scan the QR code on the right or click on the link below, you will be directed to the participant information sheet, consent form and subsequently to the questionnaire.

Thank you for your interest in the study.
